The key problem for a player is to identify a sequence of training, that will lead you to become a snooker champion.
Before you become a good snooker player you must first learn a variety of shots. There are millions of different kinds of shots.

Every good shot you play in a tournament depends on how much ground work you have done on the practice table.

Having a qualified snooker coach to monitor your game and practice will make the player more successful.

Before you start to play consistently, you must first develop a good stance, bridge hand, learn proper cueing and be able to control the path of the cue ball whether it is full ball, half ball or the control of side, screw and stun.

Over the 20 years I have been coaching I have learnt every player has their own individual style of play and no two players are alike.

As your coach, I will fine-tune your technique and work on your weak points through planned practice sessions.

I have designed specific training routines for Concentration, Cue ball Control, Tactical and Technique.

The specific training program I have designed will improve the player, and help you understand your cue action and teach you how to control the cue ball, because if you control the cue ball, you will control the match.

P.J. Nolan
Technique

“Set Training Routines for long pots, Angle shots, Pots from tight on cushions, Rest Shots, Bridging balls, and shots to open the pack”

- Pot black and pink from tight on cushions – count pots
- Pot blue from yellow, green, brown spots – count pots
